

## 64-bit Mac Compatibility Fix

Adobe has not yet released a 64-bit plug-in for Acrobat Reader that works with the Safari browser, you must set Safari to open in 32-bit mode.

See below for the simple steps to make this happen.

1. If Safari is open quit Safari by going to Safari>Quit Safari
2. Open a new Finder window and navigate to the Applications folder.
3. In the Finder, select Safari.
4. Go to File>Get Info.
5. In the "Safari Info" window, open the "General" section.
6. Select the check box "Open in 32-bit mode"

7. Close the "Safari Info" window.
8. Re-launch Safari.
