

## What is it?

The Forms Editing Toolbar is a more modern interface and improves usability.

### New Toolbar

### Old Toolbar

## What are the main changes that we get with the new Tool Bar?

The new toolbar brings some new functionality and usability changes including, but not limited to:

- Forms list on right pane is now collapsible allowing for greater forms editing screen space.
- Form Field Fonts can now be formatted differently for an individual field.
- New forms can be added using multiple navigation options.
- User and system clauses can now be accessed in the same pop-up window.
- New toolbar formats better for more screen types.
- Allows for a calendar based date picker in forms.
- Forms can be started as an individual form and added to a transaction file from the forms editing interface.

### Highlight For Mac Users!

**The new toolbar enables Mac Compatibility - We now support the default Safari Browser which comes on every Mac!**

#### What do I need to know if I'm using a Mac?

You need to have Adobe Acrobat Reader Installed and it basically works just like it does on the PC - point, click and go.

Note: Mac has recently released some new versions of OS10 where additional configuration for 64Bit Macs will be required.

[Click here to view two user guides that will help you if you are running 64Bit Macs using OS 10.6 or higher.](#)

#### Do you support any other browsers on Windows PCs?

Yes, we now support Firefox on Windows PCs. We currently do not support Firefox on the Mac OS. We'll update you if and when that changes.

#### Are there any other new software requirements?

The new toolbar now requires Adobe Acrobat 8 or higher. [Acrobat reader](#) is FREE. [Adobe Acrobat Reader is free](#) so there is no cost to you for the upgrade. Download at <http://get.adobe.com/reader/>
